

The trusted bespoke energy solution that saves you time, hassle and money!

The BMU Solution - How we support you.

Our proven solutions are simply designed to save you time and money while enhancing your service to your clients, thus leaving you to get on and manage your business and not complex energy bills.

BMU Bill Validation and More...

Our unique 10 point bill validation process quickly identifies common issues such as incorrectly applied prices, incorrect VAT rates and excessively high estimated reads. From here we then communicate with the supplier on your behalf to remedy these issues.

Our processes are very flexible and we can tailor our approach to invoice validation which dovetails with the requirements of your business.

The big BMU benefit here is that your office staff do not waste precious time manually trawling through invoices checking usage and rates to ensure accuracy of the suppliers billing, which can be a frustrating and arduous task.

Not only do we validate and identify errors we also deal with the queries and resolve them on you behalf.

Processing and efficiencies.

BMU adapt the e-billing data made available from energy suppliers to create a bespoke template to upload to your own database. The time and cost savings for all businesses is significant. Painful keyboard tapping is replaced on a weekly or monthly basis with a simple .xlsx file that has all your invoice data mapped into the required format for your property database.

BMU then work with you to adapt this process for the requirements of your business, seamlessly eradicating the risk of costly, error-prone manual data entry with a slick solution that will vastly improve the efficiency of your operation.

We only trade with Property Management Companies so we fully understand the requirements of our customers.

BMU's innovative approach is now an established and trusted tool for thousands of Property Managers across the UK.

The Benefits for BMU partners

The procurement and management of energy can be a complicated and frustrating process which is why we devised our unique service to make your life easier and allow your staff to get on with more productive tasks.

We save you time and money.

The BMU system frees your staff to focus on your clients, residents and managing your properties.

In addition your Account Manager will aim to save you money on tariffs wherever possible and advise on creating new income streams.

Standards

We are proud that we not only adhere to but also set the highest of standards that others follow.

We also don't sub-contract any part of our services to third-parties, everything we do for you is carried out 'in-house' by our expert team.

Transparency and trust are central to our values to which our reputation is built on. We also appreciate that businesses face different challenges and operate as such, hence why we take a bespoke approach to each client solution and carefully personalise it to fit your needs.

“ In a competitive market place, we are delighted with the overall service provided to us and on behalf of our clients by the BMU team. ”
Trinity Estates
